SUMMARY

Product Designer with 4+ years designing and shipping web experiences across healthcare content, e-commerce, recruitment and SaaS-style portals. Work the full cycle: research and wireframes through high-fidelity UI, design systems, and working front-ends in React and WordPress, removing the fidelity loss at handoff. Use AI tools and vibe coding to prototype and build faster. **Led UX for 40+ web platforms with direct ownership of the design system and its front-end implementation.**

EXPERIENCE

PRODUCT / UX DESIGNER | InfocusRx Marketing and Communications Pvt Ltd — Dec 2021 – Present

- Own end-to-end UX and UI for 40+ healthcare websites and web portals, then build the approved designs out in React and WordPress, from research through to production code.
- Ran user research (interviews, surveys) with medical students and clinicians to uncover friction in learning and content discovery, translating findings directly into interface and flow changes.
- Designed and implemented responsive dashboards and portals with consistent, WCAG-aligned interaction patterns across desktop and mobile.
- Built interactive prototypes in Figma and Adobe XD to validate concepts pre-build, cutting rework once development starts.
- Use AI tools and vibe coding to turn ideas into working prototypes and front-end builds quickly, shortening the time from concept to a testable product.
- Hand off working front-end rather than static mockups, so engineering handoff friction and pixel-perfect rework are largely eliminated and delivery timelines are more predictable.
- Designed and built an e-commerce healthcare portal end to end: mapped user journeys, fixed checkout drop-off points, and shipped the resulting UI in code.

FREELANCE PRODUCT DESIGNER & WEB DEVELOPER — Nov 2018 – Dec 2021

- Designed and shipped custom, responsive websites end to end for business and personal clients, from UX/UI design through hand-coded HTML/CSS and WordPress build.
- Worked directly with stakeholders to scope requirements, propose UX solutions, and iterate quickly on live feedback.

KEY PROJECTS

RECRUITMENT PLATFORM / JOB PORTAL | MENA Region

- Led end-to-end design (WCAG compliance, wireframing, prototyping, user interviews, personas, journey mapping) for a multi-company recruitment agency platform to improve job search and user retention.
- Interviewed job seekers, employers, and agency staff across Saudi Arabia to resolve pain points around complex applications and language barriers.

CAMERA E-COMMERCE MOBILE APP

- Designed complete end-to-end UX: user flows, wireframes, and high-fidelity screens for camera discovery and purchase, with navigation and product detail views that support comparison and ease the path to checkout.

MRKNOWN.COM | Personal product-review and affiliate platform

- Designed and built the site end to end in React.js, Tailwind CSS and Supabase, and integrated Amazon Affiliate to power monetized product recommendations.

EDUCATION

MCA | Master of Computer Applications | Osmania University, Hyderabad — 2021 – 2023

B.SC | MSCS | Bankatlal Badruka College for Information Technology, Hyderabad — 2015 – 2018

SKILLS

PRODUCT & UX

Product Design | UI/UX Design | User Research | User Interviews | Information Architecture | Journey Mapping | Wireframing | Prototyping | Interaction Design | Usability Testing | WCAG Accessibility

DESIGN SYSTEMS

Design Systems | Component Libraries | Typography | Responsive Design | SaaS, E-commerce & Dashboard Design

DESIGN-TO-CODE & AI

React.js | HTML/CSS | Tailwind CSS | WordPress | Supabase | Framer | Vibe Coding | AI-Assisted Design & Development

TOOLS

Figma | Adobe XD | Photoshop | Illustrator | DaVinci Resolve

ACHIEVEMENTS

- Awarded "Best Employee of the Year" for delivering UI/UX solutions that measurably improved user engagement and client satisfaction.
- Received a 35% salary increment in recognition of consistent, high-quality, end-to-end delivery.
