Venkatesh Kesanakurthi

Product Designer : UI/UX + SaaS + React.js Front-End Development

iamvenkateshkvs@gmail.com | +91 86862 34530 | venkatesh.kesanakurthi.com | Hyderabad, India

Product designer with 4+ years designing and shipping web experiences. I take products from research and wireframes through to working, responsive front-ends in React and WordPress, which shortens the design-to-development loop and removes the fidelity loss that happens at handoff. Led UX for 40+ web platforms at a healthcare content business, with direct ownership of both the design system and its front-end implementation.

SKILLS

Design-to-Code: React.js, HTML/CSS, WordPress (theme & CMS implementation), Framer, responsive front-end build-out

UX Research & Strategy: User interviews, surveys, personas, journey mapping, information architecture, usability testing, WCAG accessibility

UI & Design Systems: Component libraries, interaction design, typography, responsive web/mobile design, e-commerce & dashboard design

Tools: Figma, Adobe XD, Photoshop, Illustrator, DaVinci Resolve

EXPERIENCE

Product / UX Designer & Front-End Implementer

InfocusRx Marketing and Communications Pvt Ltd Dec 2021 – Present

- Own end-to-end UX and UI for 40+ healthcare websites and web portals, then build the approved designs out myself in React and WordPress — owning the work from research through to production code.
- Run user research (interviews, surveys) with medical students and clinicians to uncover friction in learning and content discovery, translating findings directly into interface and flow changes.
- Design and implement responsive dashboards and portals with consistent, WCAG-aligned interaction patterns across desktop and mobile.
- Build interactive prototypes in Figma/Adobe XD to validate concepts pre-build, cutting rework once development starts.
- Because I hand off working front-end rather than static mockups, engineering handoff friction and pixel-perfect rework are largely eliminated — delivery timelines are more predictable.
- Designed and built an e-commerce healthcare portal end-to-end: mapped user journeys, fixed checkout drop-off points, and shipped the resulting UI in code.

Freelance Product Designer & Web Developer

Nov 2018 – Dec 2021

- Designed and shipped custom, responsive websites end-to-end for business and personal clients — from UX/UI design through hand-coded HTML/CSS and WordPress build, with no separate developer in the loop.
- Worked directly with stakeholders to scope requirements, propose UX solutions, and iterate quickly on live feedback — developing strong client ownership and communication skills.

KEY PROJECTS

Recruitment Platform / Job Portal — MENA Region

End-to-end design + build for a multi-company recruitment agency platform

- Led end-to-end design process (WCAG compliance, wireframing, prototyping, user interviews, personas, journey mapping) to optimize job search and improve user retention.
- Interviewed job seekers, employers, and agency staff across Saudi Arabia to resolve pain points around complex applications and language barriers.

Camera E-Commerce Mobile App

- Designed complete end-to-end UX — user flows, wireframes, high-fidelity screens — for camera discovery and purchase.
- Structured navigation and product detail views to support comparison, easing the path from browsing to checkout.

Affiliate Website Design & Development — mrknown.com

Personal product-review and affiliate platform

- Designed and built end-to-end UI/UX for mrknown.com, a personal affiliate product-review platform, from concept through production.
- Built the site in React.js, Tailwind CSS, and Supabase, and integrated Amazon Affiliate to power monetized product recommendations.

EDUCATION

Master of Computer Applications (MCA) — Osmania University, Hyderabad 2021 – 2023

B.Sc (MSCS) — Bankatlal Badruka College for Information Technology, Hyderabad 2015 – 2018

ACHIEVEMENTS

- Awarded "Best Employee of the Year" for delivering UI/UX solutions that measurably improved user engagement and client satisfaction.
- Received a 35% salary increment in recognition of consistent, high-quality, end-to-end delivery.
